

NICHOLAS FARRELL

FULL STACK WEB DEVELOPER

PROFILE

Full Stack Web Developer leveraging a background in nursing/psychology to build a more intuitive user experience on the web. Mostly recently, I applied aspects of UX and agile development in a project where I worked in a team of four to develop a multi-page MERN app that allows the user to create and/or complete custom forms. It can be used in any workplace to test employees comprehension, classrooms, or even just for fun.
